WHAT IS ADVENTURE WITHOUT BOUNDARIES?

MEET THE OSBORNES, founders of Osborne Adventure, a global sailing expedition challenging the way the world sees Down syndrome. Together, as a family, they are preparing to sail around the world, including a passage from Antarctica to the Arctic.

At the heart of the mission is their 10-year-old son, Ren, a young explorer with Down syndrome.

Along the way, the family is producing Adventure Without Boundaries, a free educational docuseries created specifically for K-5 educators. Students explore STEM, social-emotional learning, world cultures, and geography through real-world adventure.

Each 20 minute classroom lesson includes a short video, a complete lesson plan, and grade appropriate worksheets.

THIS IS NOT A VLOG. It is an educational series designed to show that a diagnosis does not define someone's potential.

For students, Ren represents something rarely seen: a peer with disabilities doing extraordinary things.
