

PEOPLE WITH DOWN SYNDROME

AGE 6 YEARS & UP

May be eligible to participate in a new research study

What is this study about?

This new study is designed for people with Down syndrome and obstructive sleep apnea. The study will look at an individualized, precision medicine approach to treat obstructive sleep apnea.

What will be done for this study?

Individuals with Down syndrome age 6 or older may be eligible to participate. Study participants will use a study treatment (either oxygen or medication) for 12 months. Participating in this study involves 2 study visits, one at the beginning and one at the end of the study. The study visits consist of an overnight sleep study, questionnaires, and assessments. Participants will be compensated for the time involved.
