

# In-Home Research Study for Infants with Down Syndrome

**PURPOSE:** To learn about the nature of everyday activity in infants with Down syndrome before and after they can walk

## WHAT IS INVOLVED:

- Home visits to observe your child's play and motor skills
- Wearing step-counting devices on their ankles throughout their daily activities

**WHO CAN PARTICIPATE:** Children with Down syndrome (13-40 months of age)

**COMPENSATION:** Families will receive a \$20 Amazon card per visit
